GEORGE CUMING,

City Inspector.

New-York, January 26th, 1829.

REMARKS.

The City Inspector respectfully reports to the Board, a statement of the Interments in the City and County of New-York, for the year *one thousand eight hundred and twenty-eight*, amounting to

5181.

The reader of the report of the preceding year, will observe with surprise, that the number of Deaths in those successive years, is exactly the same, (5181) a coincidence as singular, perhaps, as can be found on record; and especially when it is known how much the population of this city has increased within the last year.

The total number of *colored persons* that died were 630.

The Consumptive cases were 906, of which 99 were *colored persons.*

The cases of Fever and Infantile Diseases vary little from what is usual; but our continued exemption from the desolating effects of *Yellow Fever*, must be a source of real gratitude and thankfulness.

Notwithstanding the vast and obvious advantage bestowed on mankind by the discovery of *Vaccination*, it is melancholy to observe the indifference with which its blessings are viewed by many, when we have to report the death of 93 persons by that loathsome disease, the *Small Pox*, whilst it is some consolation to find that the number is much less than in the preceding year.

Respectfully submitted,

G. CUMING,

City Inspector

New-York, 26*th January*, 1829.
